Fantacalcio Simulation Suite Report

Comprehensive Fantasy Football Analysis

Generated on August 10, 2025

By Fantacalcio Analysis System

Analysis Configuration:
• Teams: 8
• Budget: €400
• Data: Quotazioni_Fantacalcio_Stagione_2025_26.xlsx

Executive Summary

Scarcity Analysis:
- Analyzed 514 players across 4 positions
- Average EV score: 2.74
- Top tier players: 52
- Risk assessment completed for all positions

Shading Analysis:
- Monte Carlo simulations: 10000
- Ownership variance analyzed for 514 players
- Tournament EV calculated with 95% confidence
- Optimal lineup construction strategies identified

Tier Analysis:
- Players Classified: 514
- Elite / High / Medium: 57 / 144 / 211
- Low / Bench: 0 / 102

Auction Strategy:
- Simulations Run: 1000
- Avg Team Quality: 0.00
- Avg Budget Utilization: 0.0%
- Targets (High+): 11 / Total Targets: 33

Auction Flow Analysis:
- Generated 383 strategic recommendations
- Budget allocation across 4 positions
- 3 nomination rounds planned
- Average strategy confidence: 55.0%

Key Recommendations:
- **Focus on high-EV players identified in scarcity analysis**
- **Consider ownership levels when making final lineup decisions**
- **Follow nomination timeline for optimal auction strategy**
- **Monitor budget allocation to avoid overspending in early rounds**

Scarcity Analysis

Expected Value and Position Scarcity Assessment

Analysis Overview:
• Total Players Analyzed: 514
• Positions Covered: 4
• Average EV Score: 2.74
• Top Tier Players: 52

Shading Analysis

Monte Carlo Ownership and Tournament Variance

Simulation Overview:
• Monte Carlo Runs: 10000
• Players Analyzed: 514
• Confidence Level: 95%
• Ownership Variance: 0.03503098148454165

Tier Analysis

Player Classification and Tier Distribution

Classification Overview:
• Total Players Classified: 514
• Elite Tier: 57
• High Tier: 144
• Medium Tier: 211
• Low/Bench Tier: 102

Auction Strategy Analysis

Strategic Bidding and Player Targeting

Strategy Overview:
• Simulations Run: 1000
• Player Targets: 33 identified
• Budget Allocation: 400 credits allocated
• Strategy Confidence: 0.0%

Auction Flow Analysis

Strategic Bidding and Budget Allocation

Strategy Overview:
• Total Strategies: 383
• Budget Utilization: 100.0%
• Nomination Rounds: 3
• Avg Confidence: 55.0%

Nomination Strategy Timeline

Round 7

Kean... (A-C)
Target: 325, Max: 375

Thuram... (A-C)
Target: 270, Max: 318

David... (A-C)
Target: 236, Max: 278

Gimenez... (A-C)
Target: 222, Max: 261

De Ketelaere... (A-C)
Target: 144, Max: 170

Dia... (A-C)
Target: 125, Max: 147

Immobile... (A-C)
Target: 119, Max: 140

Krstovic... (A-C)
Target: 117, Max: 138

Lang... (A-C)
Target: 80, Max: 94

Zapata D... (A-C)
Target: 68, Max: 80

Pellegrino M... (A-C)
Target: 52, Max: 61

Kuhn... (A-C)
Target: 45, Max: 53

Gonzalez N... (A-C)
Target: 31, Max: 36

Nzola... (A-C)
Target: 24, Max: 28

Cambiaghi... (A-C)
Target: 22, Max: 26

Cutrone... (A-C)
Target: 21, Max: 25

Dominguez B... (A-C)
Target: 20, Max: 24

Ngonge... (A-C)
Target: 20, Max: 24

Aboukhlal... (A-C)
Target: 20, Max: 24

Camarda... (A-C)
Target: 19, Max: 22

Auction Flow Analysis

Budget Allocation by Position and Tier

Budget Allocation Analysis

Methodology & Notes

Analysis Methodology:

Scarcity Analysis:
• Expected Value (EV) calculation based on historical performance
• Position scarcity assessment using supply/demand ratios
• Risk factor analysis incorporating injury history and consistency
• Tier-based player categorization for strategic planning

Shading Analysis:
• Monte Carlo simulation with 10,000+ iterations
• Ownership projection based on player popularity and price
• Tournament variance calculation for GPP optimization
• Lineup construction with correlation considerations

Auction Flow Analysis:
• Budget allocation optimization across positions and tiers
• Nomination strategy based on market timing
• Bidding recommendations with confidence intervals
• Strategic categorization (aggressive, patient, value)

Data Sources:
• Player valuations from official Fantacalcio sources
• Historical performance data and projections
• Market trends and ownership patterns

Disclaimer:
• All projections are estimates based on available data
• Fantasy football involves inherent uncertainty
• Use this analysis as one factor in decision-making
• Past performance does not guarantee future results
